

Human Dopaminergic Neuron Cell Growth Medium (HDaNCGM)
ORDERING INFORMATION

Product Name	Human Dopaminergic Neuron Cell Growth Medium (HDaNCGM)
Catalog No:	cAP-63
Size:	500ml
Storage:	4°C

Product Description

Human Dopaminergic Neuron Cell Growth Medium (HDaNCGM) is freshly prepared by mixing the following two components: (1) 450ml of Human Dopaminergic Neuron Cell Basal Medium (HDaNCBM) and (2) 50ml of Human Dopaminergic Neuron Cell Growth Supplement (cAP-04), which contains the essential nutrients for human Human Dopaminergic Neuron Cell Growth (including 10% fetal bovine serum, recombinant growth factors, and 1x penicillin and streptomycin).

Shipping Condition: Ambient temperature or blue ice (seasonally)

Storage Condition: HDaNCGM should be stored at 4°C. A change in color or appearance of precipitate may indicate deterioration.

Shelf Life: 2 months from the date of receipt under proper storage condition.

1. Ready to use.
2. Avoid frequent temperature changes to the entire bottle of medium.
3. We recommend medium changing every 2 days for regular cell expansion culture.

THESE PRODUCTS ARE FOR RESEARCH USE ONLY

Caution: Handling human and animal tissue derived products is potentially bio-hazardous. Although each cell strain is tested negative for HIV, HBV and HCV DNA, or pathogens, diagnostic tests are not necessarily 100% accurate; therefore proper precautions must be taken to avoid inadvertent exposure. Always wear gloves and safety glasses when working with these materials. Never mouth pipette. We recommend following the universal procedures for handling products of human origin as the minimum precaution against contamination.
