

Schwann Cell Growth Medium
ORDERING INFORMATION

| | |
|---------------------|--|
| Product Name | Schwann Cell Growth Medium (ScGM) |
| Catalog No: | cAP-65 |
| Size: | 500ml |
| Storage: | 4°C for 2 months |

Product Description

Schwann Cell Growth Medium (ScGM) is specifically formulated for the culture Schwann Cell Like Cells (cAP-0118).

ScGM is freshly prepared by mixing the following two components: (1) 450ml of Schwann Cell Basal Medium and (2) 50ml of Schwann Cell Growth Supplement, which contains the essential nutrients for limited proliferative capacity of the Schwann Cell Like Cells (including 10% fetal bovine serum, recombinant growth factors, and 1x penicillin and streptomycin).

Shipping Condition: Ambient temperature or blue ice (seasonally only)

Storage Condition: ScGM should be stored at 4°C. A change in color or appearance of precipitate may indicate deterioration.

Shelf Life: 2 months from the date of receipt under proper storage condition.

1. Ready to use.
2. Avoid frequent temperature changes to the entire bottle of medium.
3. We recommend medium changing every 2-3 days for regular cell expansion culture.

Ingredients: Proprietary, MSDS is available.

THESE PRODUCTS ARE FOR RESEARCH USE ONLY

Caution: Handling human and animal tissue derived products is potentially bio-hazardous. Although each cell strain is tested negative for HIV, HBV and HCV DNA, or pathogens, diagnostic tests are not necessarily 100% accurate; therefore proper precautions must be taken to avoid inadvertent exposure. Always wear gloves and safety glasses when working with these materials. Never mouth pipette. We recommend following the universal procedures for handling products of human origin as the minimum precaution against contamination.
