## Mouse anti-human Interleukin-12

### ORDERING INFORMATION

**Catalog No:** hAP-0362  
**Size:** 100 µg  
**Storage:** < -20° C  
**Immunogen:** Human recombinant IL-12  
**Ig Type:** mouse IgG1  
**Clone:** MM0362-7M58  
**Applications:** WB, IHC and Neutralization

**Preparation:** This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with **human recombinant protein of IL-12**).

**Formulation and Storage:** The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

**Reconstitution:** Reconstitute the antibody with 200 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

**Specificity:** This antibody was selected for its ability to detect human **IL-12**.

#### *Applications:*

- |    |                                     |     |              |
|----|-------------------------------------|-----|--------------|
| 1. | WB                                  | Yes | (1:500-2000) |
| 2. | IHC (frozen)                        | Yes | (1:20-100)   |
| 3. | Neutralization of IL-12 bioactivity | Yes |              |

**Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only**
