Mouse Monoclonal anti human AKT1

ORDERING INFORMATION

Catalog No:	hAP-0649
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human AKT1
Ig Type:	mouse IgG1
Clone:	MM0649-4D16
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with recombinant human AKT1).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500 µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human AKT1, but not AKT2 and 3 by WB. It cross reacts with mouse and rat AKT1 protein.

Applications:

1.	WB	Yes	1:1000-2000
----	----	-----	-------------

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
