

Rat Monoclonal anti Human FKBP-25

ORDERING INFORMATION

Catalog No:	hAP-1000
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human FKBP-25
Ig Type:	Rat IgG2
Clone:	MM1000-4O12
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a rat immunized with recombinant human FKBP-25 (FK506 binding protein, 25 kilodalton molecular weight). FKBP-25 is also called FKBP3 and is a peptidyl-prolyl isomerase that catalyzes the transition between cis- and trans-proline residues critical for proper folding of proteins.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human FKBP-25 in direct ELISAs and WBs. It cross reacts with mouse and rat FKBP-25 in WBs.

Applications:

1.	WB	Yes	1:1000-2000
-----------	-----------	------------	--------------------

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
