

Mouse Monoclonal anti Human TGF- beta receptor II

Catalogue Number	hAP-0056
Size/Concentration	100µg
Immunogen	Recombinant hu-TGFβRII extra cellular domain
Clone Name	MM0056-4F14
Antibody Isotype	Mouse IgG1
Preparation	This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with recombinant human TGF-β receptor II extra cellular domain.
Formulation and Storage	The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.
Specificity	This antibody was selected for its ability to detect human TGFβ RII. No cross reactivity was found to rhTGF-β RIII.
Reconstitution	Reconstitute the antibody with 500 µl sterile PBS and the final concentration is 200 µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. Avoid repeated freeze-thaw cycles.
Applications	A: WB-(1 to 100-1000) B: IHC(Paraffin)-(1 to 50-200) C: D:
Shipping	Regular FEDEX overnight shipment (ambient temperature)

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
