

## Mouse Monoclonal anti Human Activin Receptor IIA

<b>Catalogue Number</b>	hAP-0058
<b>Size/Concentration</b>	100µg
<b>Immunogen</b>	Recombinant Activin RIIA extra cellular domain
<b>Clone Name</b>	MM0058-6J16
<b>Antibody Isotype</b>	Mouse IgG2
<b>Preparation</b>	This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with recombinant human Activin receptor IIA extra cellular domain.
<b>Formulation and Storage</b>	The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.
<b>Specificity</b>	This antibody was selected for its ability to detect human Activin RIIA. No cross reactivity was found to hActivin RI and RIIB.
<b>Reconstitution</b>	Reconstitute the antibody with 500 µl sterile PBS and the final concentration is 200 µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. Avoid repeated freeze-thaw cycles.
<b>Applications</b>	A: WB-(1 to 100-1000) B: IHC(Paraffin)-(1 to 50-100) C: D:
<b>Shipping</b>	Regular FEDEX overnight shipment (ambient temperature)

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
