

Mouse Monoclonal anti Human FGF-21

Catalogue Number	hAP-0735
Size/Concentration	100µg
Immunogen	Recombinant human FGF-21
Clone Name	MM0735-13L451
Antibody Isotype	Mouse IgG2
Preparation	This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with recombinant human FGF-21).
Formulation and Storage	The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.
Specificity	This antibody recognizes human FGF-21 in direct ELISAs and WBs. In WBs, this antibody does not cross-react with recombinant human FGF acidic, rhFGF b asic, FGF-3, -4, -5, -6, -7, -8c, -9, -10, -11, -12, -13, -
Reconstitution	Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. Avoid repeated freeze-thaw cycles
Applications	A: WB-(1 to 1000-2000) B: ICC-(1 to 50-200) C: FC-Yes D:
Shipping	Regular FEDEX overnight shipment (ambient temperature)

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the end users! This product is sold for **Research Use Only**
