

Mouse Monoclonal anti Human 14-3-3 gamma

Catalogue Number	hAP-0959
Size/Concentration	100µg
Immunogen	Recombinant human 14-3-3 gamma
Clone Name	MM0959-9W63
Antibody Isotype	Mouse IgG2
Preparation	This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human 14-3-3 gamma. 14-3-3 proteins are a highly conserved family of homo- and heterodimeric phosphoserine/threonine-binding proteins.
Formulation and Storage	The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.
Specificity	This antibody recognizes human 14-3-3 in direct ELISAs and WBs. It cross reacts with mouse and rat 14-3-3 proteins in WBs.
Reconstitution	Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. Avoid repeated freeze-thaw cycles.
Applications	A: WB-(1 to 1000-2000) B: C: D:
Shipping	Regular FEDEX overnight shipment (ambient temperature)

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
