

Mouse Monoclonal anti human CBL

ORDERING INFORMATION

Catalog No:	hAP-0971
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human CBL
Ig Type:	Mouse IgG2
Clone:	MM0971-9H61
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human CBL (Lake Casitas, California mouse B-lineage Lymphoma). CBL is also called RING finger protein 55 and is a 120-125 kDa cytosolic member of the CBL family of proteins.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human CBL in direct ELISAs and WBs. It cross reacts with mouse CBL protein in WBs.

Applications:

1.	WB	Yes	1:1000-2000
