| <b>Applications:</b> | <b>WB</b>                      |

**Preparation:** This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human FIH-1 (Factor-inhibiting hypoxia-inducible factor 1). FIH-1 is also called HIF-1AN and is a 40-45kDa oxygenase that hydroxylates asparagine, aspartate, and histidine residues in target proteins.

**Formulation and Storage:** The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

**Reconstitution:** Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

**Specificity:** This antibody recognizes human FIH-1 in direct ELISAs and WBs. It cross reacts with mouse FIH-1 in WBs.

### **Applications:**

|           |           |            |                    |
