

Mouse Monoclonal anti Human GDPD2

ORDERING INFORMATION

Catalog No:	hAP-1004
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human GDPD2
Ig Type:	Mouse IgG2
Clone:	MM1004-11C23
Applications:	ICC

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human GDPD2 (Glycerophosphodiester phosphodiesterase 2). GDPD2 is also called GDE3 and is a 65kDa 7TM cell surface protein that is highly expressed in bone and spleen.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human GDPD2 in direct ELISAs. It cross reacts with mouse GDPD2 in direct ELISAs.

Applications:

1.	ICC	Yes	1:100-200
