

Mouse Monoclonal anti Human MCHR1

ORDERING INFORMATION

Catalog No:	hAP-1043
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human MCHR1
Ig Type:	Mouse IgG2
Clone:	MM1043-25B8
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human MCHR1 (melanin-concentrating hormone receptor-1). MCHR1 is also called GPR24 (G-protein coupled receptor 24) or SLC1 (somatostatin receptor-like 1) and is an approximately 44kDa, seven-transmembrane receptor for MHC.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human MCHR1 in direct ELISAs and WBs. It cross reacts with mouse and rat MCHR1 in WBs.

Applications:

1.	WB	Yes	1:1000-2000
-----------	-----------	------------	--------------------

**Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
