

Mouse Monoclonal anti Human NM23-H1/H2

ORDERING INFORMATION

Catalog No:	hAP-1055
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human NM23-H1/H2
Ig Type:	Mouse IgG2
Clone:	MM1055-7B19
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human NM23-H1/H2. NM23-H1 (Non-metastatic protein 23 homolog 1; also NDKA and NME1) is a 19-20kDa member of the NDK family of enzymes. Human NM23-H1 shares 89% aa identity with human NM23-H2, and 94% aa identity with mouse NM23-H1.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2um filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human NM23-H1/H2 in direct ELISAs and WBs. It cross reacts with mouse and rat NM23-H1/H2 in WBs.

Applications:

1.	WB	Yes	1:1000-2000
