

Mouse Monoclonal anti Human PDCD5

Catalogue Number	hAP-1063
Size/Concentration	100µg
Immunogen	Recombinant human PDCD5
Clone Name	MM1063-8M36
Antibody Isotype	Mouse IgG1
Preparation	This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human PDCD5 (programmed cell death 5). PDCD5 is also called TFAR19 (TF-1 cell apoptosis-related 19) and is a ubiquitously expressed
Formulation and Storage	The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C
Specificity	This antibody recognizes human PDCD5 in direct ELISAs and WBs. It cross reacts with mouse and rat PDCD5 in WBs.
Reconstitution	Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. Avoid repeated freeze-thaw cycles
Applications	A: WB-(1 to 1000-2000) B: IHC-P-(1 to 100-200) C: D:
Shipping	Regular FEDEX overnight shipment (ambient temperature)

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
