

Mouse Monoclonal anti Human PKN1

Catalogue Number	hAP-1071
Size/Concentration	100µg
Immunogen	Recombinant human PKN1
Clone Name	MM1071-8N63
Antibody Isotype	Mouse IgG1
Preparation	This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human PKN1 (serine/threonine protein kinase N1). PKN1 is also called PRK and is a ubiquitous 120kDa cytoplasmic kinase of the PKC s
Formulation and Storage	The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.
Specificity	This antibody recognizes human PKN1 in direct ELISAs and WBs. It cross reacts with mouse PKN1 in WBs
Reconstitution	Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. Avoid repeated freeze-thaw cycles
Applications	<p>A: WB-(1 to 1000-2000)</p> <p>B:</p> <p>C:</p> <p>D:</p>
Shipping	Regular FEDEX overnight shipment (ambient temperature)

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
