

Rat Monoclonal anti Human PON1

ORDERING INFORMATION

Catalog No:	hAP-1074
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human PON1
Ig Type:	Rat IgG2
Clone:	MM1074-32L1
Applications:	WB

Preparation: This antibody was produced from a hybridoma (rat myeloma fused with spleen cells) from a rat immunized with recombinant human PON1 (Paraoxonase-1). PON1 is also called arylesterase1 and serum paraoxonase and is a 43kDa glycoprotein that is expressed in liver and is secreted into the bloodstream where it associates with high-density lipoproteins (HDL).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human PON1 in direct ELISAs and WBs. It cross reacts with mouse PON1 in WBs.

Applications:

1.	WB	Yes	1:1000-2000
