

Mouse Monoclonal anti Human PP2C alpha

Catalogue Number	hAP-1077
Size/Concentration	100µg
Immunogen	Recombinant human PP2C alpha
Clone Name	MM1077-6E36
Antibody Isotype	Mouse IgG1
Preparation	This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human PP2C (Protein phosphatase 2C) alpha. PP2C alpha is also called Protein Phosphatase, Magnesium-dependent type 1A, and PPM1A an
Formulation and Storage	The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.
Specificity	This antibody recognizes human PP2C alpha direct ELISAs and WBs. It cross reacts with mouse and rat PP2C alpha in WBs.
Reconstitution	Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. Avoid repeated freeze-thaw cycles.
Applications	A: WB-(1 to 1000-2000) B: C: D:
Shipping	Regular FEDEX overnight shipment (ambient temperature)

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
