

Mouse Monoclonal anti Human RPL17

ORDERING INFORMATION

Catalog No:	hAP-1090
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human RPL17
Ig Type:	Mouse IgG1
Clone:	MM1090-9G17
Applications:	WB and IHC-P

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with Recombinant human RPL17 (Ribosomal protein-large subunit 17). RP-L17 is a 23kDa component of the ribosomal large subunit, and is the mammalian ortholog of the bacterial protein, L22.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2um filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human RPL17 in direct ELISAs and WBs. It cross reacts with mouse RPL17 in WBs.

Applications:

1.	WB	Yes	1:1000-2000
2.	IHC-P	Yes	1:100-200

**Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
