

Mouse Monoclonal anti Human SATB1

ORDERING INFORMATION

Catalog No:	hAP-1097
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human SATB1
Ig Type:	Mouse IgG2
Clone:	MM1097-5S37
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with Recombinant human SATB1 (special AT-rich sequence binding protein-1). . SATB1 is a 103kDa nuclear matrix-associated homeobox transcription factor that binds AT rich DNA sequences at scaffolding protein attachment and viral genome integration sites.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2um filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human SATB1 in direct ELISAs and WBs. It cross reacts with mouse SATB1 in WBs.

Applications:

1.	WB	Yes	1:1000-2000
