| <b>Immunogen</b>               | Recombinant human TPT1                                                                                                                                                                                                                                                |
| <b>Clone Name</b>              | MM1111-8F37                                                                                                                                                                                                                                                           |
| <b>Antibody Isotype</b>        | Mouse IgG1                                                                                                                                                                                                                                                            |
| <b>Preparation</b>             | This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with Recombinant human TPT1 (translationally controlled tumor protein 1). TPT1 is also called TCTP, HRF and fortilin and is a 23kDa member of the TC       |
| <b>Formulation and Storage</b> | The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.    |
| <b>Specificity</b>             | This antibody recognizes human TPT1 in direct ELISAs and WBs. It cross reacts with mouse and rat TPT1 in WBs.                                                                                                                                                         |
| <b>Reconstitution</b>          | Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. Avoid repeated freeze-thaw cycles. |
| <b>Applications</b>            | A: WB-(1 to 1000-2000)<br>B:<br>C:<br>D:                                                                                                                                                                                                                              |
| <b>Shipping</b>                | Regular FEDEX overnight shipment (ambient temperature)                                                                                                                                                                                                                |

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
