

Mouse Monoclonal anti Human YAP1

ORDERING INFORMATION

Catalog No:	hAP-1118
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human YAP1
Ig Type:	Mouse IgG1
Clone:	MM1118-5M32
Applications:	WB and IHC-P

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with Recombinant human YAP1 (Yes-associated protein 1). YAP1 is also called YAP65 or Yorkie Homolog and is a widely expressed 65kDa cytoplasmic and nuclear transcriptional regulator protein in the Hippo pathway that regulates organ size.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2um filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human YAP1 in direct ELISAs and WBs. It cross reacts with mouse and rat YAP1 in WBs.

Applications:

1. IHC-P	Yes	1:100-200
