| <b>Antibody Isotype</b>        | IgG                                                                                                                                                                                                                                                                       |
| <b>Preparation</b>             | This antibody was produced from a sheep immunized with purified human CASPR1 protein.                                                                                                                                                                                     |
| <b>Formulation and Storage</b> | The IgG fraction of immunized serum was purified by antigen affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.             |
| <b>Specificity</b>             | Detects human Caspr1 in direct ELISAs. In direct ELISAs, less than 1% cross reactivity with recombinant human Caspr2 is observed.                                                                                                                                         |
| <b>Reconstitution</b>          | Reconstitute the antibody with 100 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 °C for at least for six months without detectable loss of activity. Avoid repeated freeze-thaw cycles. |
| <b>Applications</b>            | A: IHC(Paraffin/Frozen)-(1 to 50-100)<br>B:<br>C:<br>D:                                                                                                                                                                                                                   |
| <b>Shipping</b>                | Regular FEDEX overnight shipment (ambient temperature)                                                                                                                                                                                                                    |

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
