

Rat Monoclonal anti Mouse LPS-inducible CC chemokine receptor (LCCR)

ORDERING INFORMATION

Catalog No:	mAP-0382
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant mouse LCCR
Ig Type:	Rat IgG1
Clone:	RM0382-6R26
Applications:	ICC and FC

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with recombinant mouse Lipopolysaccharide-inducible CC chemokine receptor (LCCR), also called CCRL2).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes mouse LCCR by direct ELISAs.

Applications:

- | | | | |
|----|-----|-----|-----------|
| 1. | ICC | Yes | 1:100-200 |
| 2. | FC | Yes | |

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
