

Rat Monoclonal anti Mouse HSF-1

ORDERING INFORMATION

Catalog No:	mAP-0444
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant mouse HSF-1
Ig Type:	Rat IgG2
Clone:	RM0444-6Q53
Applications:	IHC-F

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with recombinant mouse HSF-1 (Heat Shock Factor 1). HSF1 is a 75-80 kDa constitutively expressed protein that functions as a transcriptional regulator under heat shock conditions.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes mouse HSF-1 by direct ELISAs.

Applications:

1.	IHC-F	Yes	1:1000-2000
