

Rat Monoclonal anti Mouse VSIG2

ORDERING INFORMATION

Catalog No:	mAP-0562
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant Mouse VSIG2
Ig Type:	Rat IgG1
Clone:	RM0562-4E27
Applications:	IHC-F

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with recombinant mouse VSIG2 (V-set and Ig domain-containing protein 2). VSIG2 is also called CTM and CT-like protein and is a 50-60 kDa member of the CTX family of Ig-Superfamily proteins.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes mouse VSIG2 by direct ELISAs.

Applications:

1. IHC-F	Yes	1:100-200
-----------------	------------	------------------

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
