

Streptavidin-NC Recombinant

Item Number	rAP-4856
Synonyms	
Description	Recombinant Streptavidin-NC produced in E.Coli is a single, non-glycosylated, polypeptide chain having a molecular mass of 24kDa. Recombinant Streptavidin-NC not only binds to nitrocellulose membrane readily but also preserves the full biotin binding ability.
Uniprot Accession Number	
Amino Acid Sequence	
Source	Escherichia Coli.
Physical Appearance and Stability	Sterile Liquid formulation. Streptavidin-NC although stable at 4°C for 3 weeks, should be stored below -18° C. Please prevent freeze thaw cycles.
Formulation and Purity	The sterile solution contains 10mM K ₂ HPO ₄ -KH ₂ PO ₄ , pH 7.3. Greater than 94.0% as determined by SDS-PAGE.
Application	
Solubility	
Biological Activity	
Shipping Format and Condition	Lyophilized powder at room temperature.

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
