

## Cytomegalo Virus Pp150 (UL32) Recombinant

<b>Item Number</b>	rAP-5137
<b>Synonyms</b>	
<b>Description</b>	The E.Coli derived recombinant protein contains the CMV Pp150 (UL32) immunodominant regions, 1011-1048 amino acids.
<b>Uniprot Accession Number</b>	
<b>Amino Acid Sequence</b>	
<b>Source</b>	Escherichia Coli.
<b>Physical Appearance and Stability</b>	CMV Pp150 protein although stable at 4°C for 1 week, should be stored below -18°C. Please prevent freeze thaw cycles.
<b>Formulation and Purity</b>	(1mg/ml) 25mM Tris-HCl pH 8.0, 1mM EDTA and 50% glycerol. CMV Pp150 protein is >95% pure as determined by 10% PAGE (coomassie staining).
<b>Application</b>	CMV Pp65 antigen is suitable for ELISA and Western blots, excellent antigen for detection of CMV with minimal specificity problems.
<b>Solubility</b>	
<b>Biological Activity</b>	
<b>Shipping Format and Condition</b>	Lyophilized powder at room temperature.

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
