

Zika Ectodomain Recombinant

Item Number	rAP-5511
Synonyms	
Description	Recombinant Zika Ectodomain is a glycosylated protein, produced using baculovirus vectors in insect cells and its Mw is approximately 45kDa. The Zika Ectodomain is a recombinant protein of the ectodomain of the envelope protein from the Suriname Zika virus strain.
Uniprot Accession Number	
Amino Acid Sequence	
Source	Baculovirus Insect Cells.
Physical Appearance and Stability	Sterile Filtered solution. Zika Ectodomain should be stored at 4°C. Do not freeze!
Formulation and Purity	The Zika Ectodomain solution 10mM Sodium phosphate, pH 7.2, 150mM NaCl. Greater than 90.0% as determined by SDS-PAGE.
Application	
Solubility	
Biological Activity	
Shipping Format and Condition	Lyophilized powder at room temperature.

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
