Target Molecule	Name: OVA Aliases: N/A MW: N/A Entrez Gene ID: N/A
Description	<p>Ovalbumin (OVA) is used in variety of laboratories products which contain OVA as a carrier protein. To raise antibodies against small non-immunogenic molecules, called haptens, it is often necessary to couple them to carrier protein, such as OVA. This antibody is a good reagent that may be used for the development of detection assay in ELISA or western blot to test the remaining OVA for clinical products in Vivo or re-search products In Vitro.</p>
