

Mouse Monoclonal Antibody to MAP2K7

Cataloge Number	sAP-0641
Target Molecule	Name: MAP2K7 Aliases: MKK7; Jnkk2; MAPKK7; PRKMK7 MW: 48kDa Entrez Gene ID: 5609
Description	The protein encoded by this gene is a dual specificity protein kinase that belongs to the MAP kinase kinase family. This kinase specifically activates MAPK8/JNK1 and MAPK9/JNK2, and this kinase itself is phosphorylated and activated by MAP kinase kinase kinases including MAP3K1/MEKK1, MAP3K2/MEKK2, MAP3K3/MEKK5, and MAP4K2/GCK. This kinase is involved in the signal transduction mediating the cell responses to proinflammatory cytokines, and environmental stresses. Multiple alternatively spliced transcript variants encoding distinct isoforms have been found, but only one transcript variant has been supported and defined.
