

Mouse Monoclonal Antibody to IRAK3

Catalogue Number	sAP-1128
Target Molecule	Name: IRAK3 Aliases: ASRT5; IRAKM MW: 67.8kDa Entrez Gene ID: 11213
Description	This gene encodes a member of the interleukin-1 receptor-associated kinase protein family. Members of this family are essential components of the Toll/IL-R immune signal transduction pathways. This protein is primarily expressed in monocytes and macrophages and functions as a negative regulator of Toll-like receptor signaling. Mutations in this gene are associated with a susceptibility to asthma. Alternate splicing results in multiple transcript variants.;
