

Mouse Monoclonal Antibody to CALB2

Catalogue Number	sAP-1135
Target Molecule	Name: CALB2 Aliases: CR; CAL2; CAB29 MW: 31.5kDa Entrez Gene ID: 794
Description	This gene encodes an intracellular calcium-binding protein belonging to the troponin C superfamily. Members of this protein family have six EF-hand domains which bind calcium. This protein plays a role in diverse cellular functions, including message targeting and intracellular calcium buffering. It also functions as a modulator of neuronal excitability, and is a diagnostic marker for some human diseases, including Hirschsprung disease and some cancers. Alternative splicing results in multiple transcript variants.;
