

Mouse Monoclonal Antibody to CDH11

Catalogue Number	sAP-1334
Target Molecule	Name: CDH11 Aliases: OB; CAD11; CDHOB; OSF-4 MW: 88kDa Entrez Gene ID: 1009
Description	This gene encodes a type II classical cadherin from the cadherin superfamily, integral membrane proteins that mediate calcium-dependent cell-cell adhesion. Mature cadherin proteins are composed of a large N-terminal extracellular domain, a single membrane-spanning domain, and a small, highly conserved C-terminal cytoplasmic domain. Type II (atypical) cadherins are defined based on their lack of a HAV cell adhesion recognition sequence specific to type I cadherins. Expression of this particular cadherin in osteoblastic cell lines, and its upregulation during differentiation, suggests a specific function in bone development and maintenance. ;
