

Mouse Monoclonal Antibody to ESRRA

Catalogue Number	sAP-1424
Target Molecule	Name: ESRRA Aliases: FSH; NAT; RNF3; FSRG1; RING3; D6S113E; O27.1.1 MW: 88kDa Entrez Gene ID: 6046
Description	The protein encoded by this gene is a nuclear receptor that is closely related to the estrogen receptor. This protein acts as a site-specific transcription regulator and has been also shown to interact with estrogen and the transcription factor TFIIB by direct protein-protein contact. The binding and regulatory activities of this protein have been demonstrated in the regulation of a variety of genes including lactoferrin, osteopontin, medium-chain acyl coenzyme A dehydrogenase (MCAD) and thyroid hormone receptor genes. A processed pseudogene of ESRRA is located on chromosome 13q12.1. Alternatively spliced transcript variants have been found for this gene.;
