| <b>Description</b>             | ANAPC11 (Anaphase Promoting Complex Subunit 11) is a Protein Coding gene. Among its related pathways are Immune System and Cellular Senescence. GO annotations related to this gene include ubiquitin-protein transferase activity and ubiquitin-ubiquitin ligase activity.; |
| <b>Immunogen</b>               | Purified recombinant fragment of human ANAPC11 (AA: 1-196) expressed in E. Coli.                                                                                                                                                                                             |

| <b>Size and Concentration</b>  | 100µg/1mg/ml                                                                                                                                                                                                                                                                 |
| <b>Supplied as</b>             | Lyophilized Powder from 100µl of Purified antibody in PBS with 0.05% sodium azide                                                                                                                                                                                            |
| <b>Reconstitution/Storages</b> | Reconstituted with 100µl sterile DI H <sub>2</sub> O, at stored at 4°C or -20°C for short or long term storage                                                                                                                                                               |
| <b>Applications</b>            | ELISA: 1 to 10000; WB: 1 to 500 - 1 to 2000; IHC: ; ICC: ; FCM:                                                                                                                                                                                                              |
| <b>Shipping</b>                | Regular FEDEX overnight shipment (ambient temperature)                                                                                                                                                                                                                       |
