

Mouse Monoclonal Antibody to ADAMTS1

Catalogue Number	sAP-1482
Target Molecule	Name: ADAMTS1 Aliases: IPOB; IPO-B; MNSOD; MVCD6; Mn-SOD MW: 24.7kDa Entrez Gene ID: 6648
Description	This gene encodes a member of the ADAMTS (a disintegrin and metalloproteinase with thrombospondin motif) protein family. Members of the family share several distinct protein modules, including a propeptide region, a metalloproteinase domain, a disintegrin-like domain, and a thrombospondin type 1 (TS) motif. Individual members of this family differ in the number of C-terminal TS motifs, and some have unique C-terminal domains. The protein encoded by this gene contains two disintegrin loops and three C-terminal TS motifs and has anti-angiogenic activity. The expression of this gene may be associated with various inflammatory processes as well as development of cancer cachexia. This gene is likely to be necessary for normal growth, fertility, and organ morphology and function.;
