

Mouse Monoclonal Antibody to HTR3B

Catalogue Number	sAP-1627
Target Molecule	Name: HTR3B Aliases: 5-HT3B MW: 50.3kDa Entrez Gene ID: 9177
Description	The product of this gene belongs to the ligand-gated ion channel receptor superfamily. This gene encodes subunit B of the type 3 receptor for 5-hydroxytryptamine (serotonin), a biogenic hormone that functions as a neurotransmitter, a hormone, and a mitogen. This receptor causes fast, depolarizing responses in neurons after activation. It is not functional as a homomeric complex, but a pentaheteromeric complex with subunit A (HTR3A) displays the full functional features of this receptor.
